New Cosmetics

01

Artero Cosmetics combine the experience of a century-old grooming company, along with the collaboration of top dog groomers. Made with top-quality ingredients, respectful of the environment and 100% Made in Spain.

A change that enhances the experience without altering what matters most: the same formula, with the quality that defines us.

ARTERO continues to evolve without losing its essence. We've redesigned the packaging of our cosmetics line to offer a more modern, intuitive, and sustainable image, while preserving the high quality that defines us. A change designed to improve the experience without changing what matters most: the same trusted formula.

Why this change?

Sustainability and Environmental commitment: We now use 100% recycled and recyclable PET and rPET packaging, reducing our environmental impact.

Usability innovation: Ergonomic designs and improvised dispensing systems make our product easier to use, providing a more comfortable, practical, and efficient experience with every use.

A look aligned with our identity: A design that reflects Artero's evolution while remaining true to our brand values.

A further step towards excellence, reinforcing our commitment to quality, innovation, and respect for the environment.

A color for each product family to identify our cosmetics

To make the user experience even more intuitive, we've developed a color system that assigns a specific tone to each product family in our cosmetics line. This way, distinguishing a **Shampoo**, **Conditioner**, **Finishing** product, **Hygiene** product, or **Perfume** becomes much easier—while maintaining Artero's visual coherence.

The pastel tones chosen for each family not only provide harmony and elegance, but also **convey our core values: well-being, health, care, hygiene, and beauty**. A design created to guide users in their choices without losing the essence of ARTERO.

Cosmetics

for Coat Types

USE OF COSMETICS FOR DIFFERENT HAIR TYPES

Dogs and cats have many different coat types and colors.

This chart will help us to use the best combination of cosmetics during bathing and brushing, according to the type of coat, color and the condition in which the pet arrives at the grooming salon.

The shampoo should always be applied twice for a thorough cleansing and to get best results from the properties of each product.

Conditioner should be applied after shampooing.

Please note there are also instances when we can combine different products for the best results.

Pop

Foam Handle for Tools

This accessory complements the Nature Collection family. "Pop" it onto the handle of any of the Nature Collection tools for a more comfortable, non-slip grip on the tool while working. It also reduces fatigue thanks to its padding that avoids an overexertion of grip in hard work. **INSTRUCTIONS FOR USE:** Lubricate the inside of the hole with a conditioner or oil. Place the handle in the hole and ease it up to the top. As soon as the lubricant dries, the POP handle grip will be well fixed.

Clothing measurements

KNOW YOUR MEASUREMENTS

When purchasing a piece of Artero workwear it is very important to know your measurements so that you choose the correct size for you. Please refer to the following charts to determine your exact size.

WHAT SHOULD I MEASURE? CHEST, WAIST AND HIPS

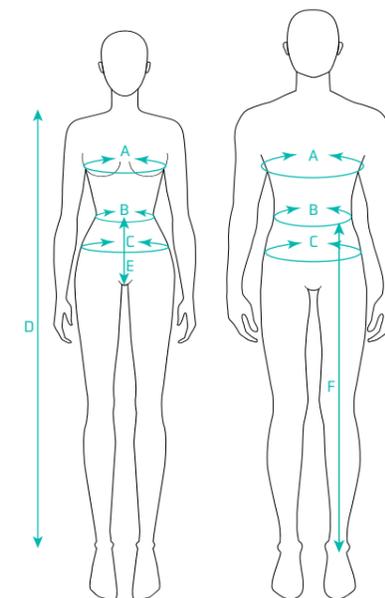

In order to measure correctly, hold the tape-measure loosely and horizontally, and wrap round the relevant part of your body. It helps to do this in front of a mirror, and it is best not to have any loose-fitting clothes on when you measure.

For smocks, shirts and t-shirts, you should measure:

CHEST: Measure around the body at the most prominent point of the chest and back. Just below the armpit.

WAIST: Measure round your waist quite tightly.

HIP: Measure round the widest part of the hip.

ARTERO

STYLING TEAM

LINDSEY BERRY

Grooming for me is the opportunity to combine my love of art with my love for dogs, and to help dogs feel their best. When I compete, it's a chance to test my skills against the best in the industry, but at the end of the day it's a competition against myself and it drives me to become the best I can.

GRACE ADRIANI

Handstripping is my favorite grooming technique. I enjoy the challenge it presents and am glad to see that it is growing in popularity. I strive to always keep learning and improving. Becoming a competition groomer has allowed me to continue to learn and hone my grooming skills.
